IN THE SPECIFICATION

Page 1, in the paragraph beginning on line 1, please insert the heading as follows: |

BACKGROUND OF THE INVENTION

B2 The present invention relates to a driver circuit for a display device including a means for storing a basic setting of an adjustable characteristic of the driver circuit.

Page 2, in the paragraph beginning on line 1, please insert the heading as follows:

SUMMARY OF THE INVENTION

B3 It is an object of the present invention to provide a driver device that is optimized for obtaining a display with optimum optical quality without the need for adjustment by the user.

Page 2, in the paragraph beginning on line 4, please amend as follows:

B4 SUB C1
~~To achieve this, the driver circuit is characterized in that it the driver circuit includes a means for storing a correction factor to correct the basic setting of the adjustable characteristic of the driver circuit, and in that the driver circuit is operative to~~

By Sub
COST. CI

adjust the adjustable characteristic based on the basic setting and the correction factor.
